

# VisualSP Classic Inline Help Targets Reference

[support.visualsp.com/knowledge-base/visualsp-inline-help-targets-reference/](https://support.visualsp.com/knowledge-base/visualsp-inline-help-targets-reference/)

March 25, 2019

## Applies to: **VisualSP Classic**

The VisualSP Help System provides in-context and on-demand help to your users when and where they need it most. Inline Help displays a help icon  on the page near 'targets' on each page (typically sections, controls, or links). Clicking on this help icon exposes all of the help assets (videos, reference documents, tip sheets, etc.) available at that location.

Configuration of this inline help target is performed when you are configuring a Help item at the *Manage VisualSP Help Item* page. The following image shows the section of this page where the *Inline Help Target* is configured.

jQuery selectors API documentation.'"/>

This article shows you which inline help targets are available out-of-the-box and where the help icon and help menu appears in relation to the target. In other words, when you click on an Inline help target checkbox, this article shows you where the help item will pop-up.
